

ERTEN

B2B Capability *Pack*

Private-label shirt development, sampling, bulk production, quality assurance, packing and dispatch preparation for brands.

VERSION 1.0 / 28 JULY 2026 / COMPANY-APPROVED

An integrated shirt-manufacturing workflow.

5,500 sq m

Manufacturing facility and operating area in Istanbul

Approx. 3,000/day

Finished-shirt capacity, subject to style complexity

Approx. 10,000/day

Cut-part capacity on automated cutting systems

Approx. 3,000/day

Standard pressing and packing capacity

3-7 working days

Fit or buying sample once required inputs are complete

2-4 weeks

Sales sample, depending on fabric and trim readiness

3-6 weeks

Production to dispatch preparation with approved style and materials ready

Order-specific

Lower MOQ feasibility and the final order threshold

Controlled manufacturing. Decisions in writing.

01 Quality assurance

AQL 2.5 in-line and final inspection approach. ITS procedures and reports are available on request, subject to the order scope.

02 Sedex / SMETA

Sedex membership and SMETA audit records are company-verified. Sedex membership is not presented as product certification.

03 Dispatch preparation

Products that pass final inspection move to the dispatch area and are prepared to the buyer's instructions. Delivery points and responsibilities are confirmed in the quotation.

04 Market reach

The Erten Shirts channel supports international consumer delivery, including the UK. This is market experience, not a promise of B2B delivery terms or Incoterms.
